

Eco-side™

Engineered Wood Siding

Built on solid foundations.

For over four decades, KWP has been one of the world's leading manufacturers of premium building products. We are committed to continuing to refine business strategies and activities that meet the needs of the enterprise today. KWP is dedicated to **protecting, sustaining and enhancing natural resources** that will be required in the future.

The wood we use to manufacture our Eco-Side™ collection contains 100% pre-consumer recycled content. KWP products are Eco-consciously manufactured with quality additives that increases strength, rigidity and durability while lessening our carbon footprint.

Easy to work with and stunning to look at,
Eco-Side™ siding and trims are fit for any design.

Eco-side™ **BOLD**

The beauty, authenticity and warmth of wood siding but with a modern twist. Eco-Side™ **BOLD** provides a distinctively dramatic style with rich, warm colors that will endure through the years.

Building green is easy with Eco-side™. Using 100% recycled content, Eco-side™ is FSC certified and can contribute points to LEED projects.

Resistant to termite damage, rotting, cracking and splitting, Eco-side™ is engineered to last.

Using state of the art engineering and manufacturing techniques, Eco-side™ is 50% lighter than fiber cement siding, making the panel easier than ever to handle.

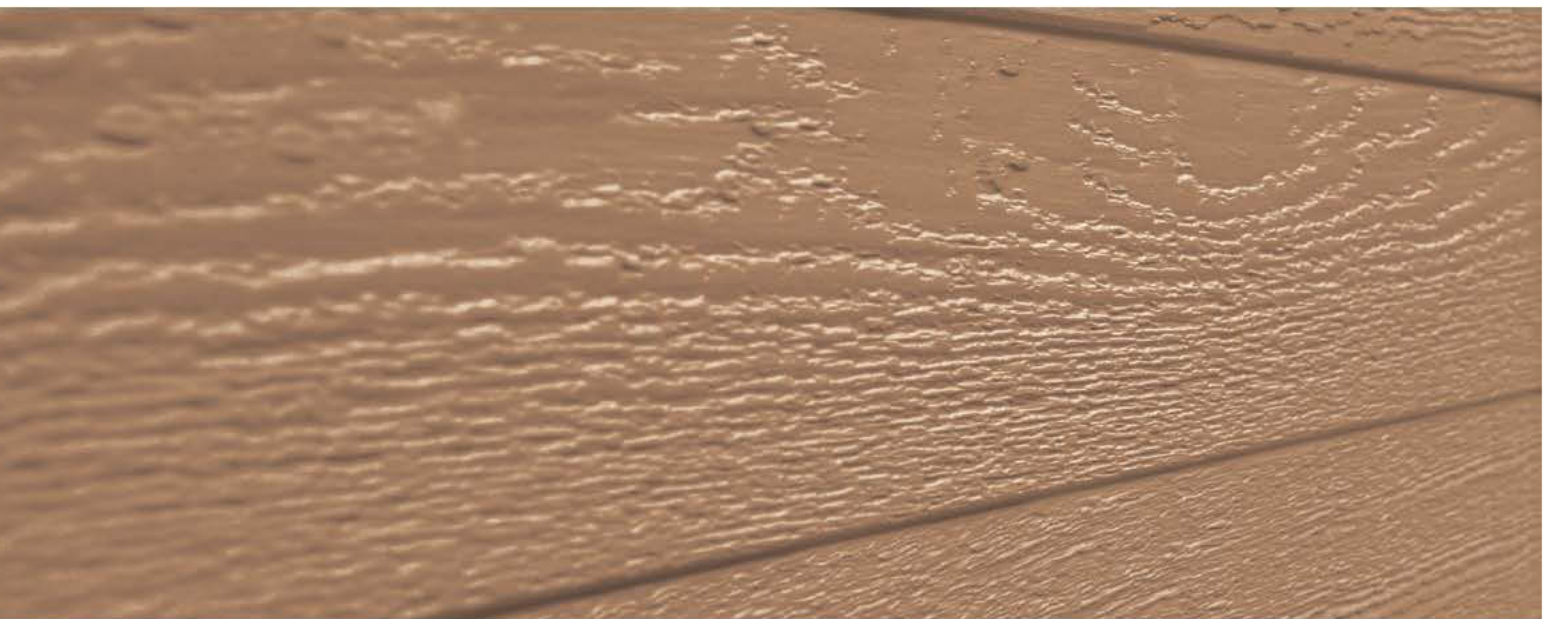

Available in 6" and 8" widths with a 3/8" thickness and a 12' length, Eco-side™ has the perfect profile for any building.

Once installed, Eco-side's™ nail hem is covered, eliminating the need for painted nails and ensuring a fresh clean look all around.

Upside down or right side up, Eco-side™ can be installed however you please.

The color of your home is an expression of its architecture, character, and surroundings. That's why we have taken great care in factory painting Eco-side™ **BOLD** in 10 designer colors. From earth tones to rich and vibrant hues, Eco-side™ **BOLD** is set to look great on your home.
