

EXPERIENCE AND RELIABILITY

Kaycan has remained a leader by staying market-focused, continually anticipating and meeting customer needs, while never forgetting its roots. As a family owned and operated company for over four decades, quality care, reliability and trust remain our most important values. An extensive range of products available in locations throughout the globe, supported by decades of experience and outstanding physical and human resources enable us to consistently deliver on-schedule and to-specification.

EXCEPTIONAL SERVICE

Kaycan products are backed by unsurpassed service. Over 1200 Kaycan personnel are dedicated to servicing our customer's needs. We offer a network of skilled and trained professionals to assure maximum performance. As a result, millions of people live and work safely and comfortably in homes featuring Kaycan products.

KAYCAN
VINYL AND ALUMINUM BUILDING PRODUCTS

UNPARALLELED **QUALITY**

Kaycan is a market leader because of our passion for quality, which delivers exceptional value to our customers. The standards of excellence that distinguish Kaycan products include superior performance, outstanding beauty, durability and low maintenance.

All Kaycan vinyl products are made with our exclusive Duratron™ Vinyl Formula, including state-of-the-art processes and the highest quality raw materials. Kaycan aluminum products are coated with an advanced Polycoat 9000™ topcoat, using a proprietary two-step system for an extremely durable, low maintenance and fade-resistant paint finish. Unparalleled quality ensures superior performance in all types of environments... from 25 degrees below zero in Northern Canada and Siberia to over 110 degrees in Southern Texas, Florida and Australia.

STATE-OF-THE-ART MANUFACTURING

Kaycan is one of the world's leading vinyl and aluminum siding and coil producers. We operate more than 5,000,000 square feet of manufacturing facilities in eleven plants and 2,500,000 square feet of distribution space in 60 centers across North America with production 24/7, fifty-one weeks a year. Our rigorous quality control and testing meet and exceed the most stringent industry and government standards at all stages of manufacturing.

INNOVATION **AND** TECHNOLOGY

Kaycan has always been extremely committed to research and development. Being a market leader means constantly searching for new ways to provide better value to our customers. While the look and style of Kaycan products are inspired by timeless quality craftsmanship, it is modern engineering and technology that enhance overall performance, durability and ease of maintenance.

SUSTAINABLE MANUFACTURING

Kaycan leads the way in the ecologically-conscious manufacturing of quality vinyl and aluminum building products. We have implemented stringent and effective raw materials usage and energy reduction processes in our eleven manufacturing facilities, as well as environmentally conscious programs in our distribution centers and corporate offices. These programs and processes have been successful in helping us attain our objectives of reducing waste and energy consumption and of recycling over 99% of materials in the manufacturing process.

As an eco-conscious manufacturer, Kaycan is continually refining its business strategies and activities to meet the needs of the enterprise today, while protecting the natural resources of the future. Kaycan has developed the R3V™ Sustainable Manufacturing Program by recycling vinyl siding at the end of its life cycle (post-consumption). Kaycan is also very proud that our products have been recognized by leading international green building programs. With a strong commitment to the environment and key partnerships with distinguished environmental organizations, Kaycan continues to build toward a greener future.
